

APCD1 Distribution Box

APCD1 Distribution Box

Designed with practicality in focus, this Splitter Distribution Box incorporates a cable management tray to securely organize fiber strands, minimizing clutter and potential damage risks.

Additional information Additional information

Primer3Plus can design qPCR Primers that straddle exon-exon-junctions, which amplify only cDNA, not genomic DNA. Exonprimer can design one pair of Sanger sequencing primers around every exon, ...

The distribution box, also known as the D-box, is a junction box positioned between the tank and the drain field. Its primary function is to evenly distribute the septic tank effluent (wastewater) from the ...

Featuring 8 fiber ports, comprising 2 inlet, 8 outlets, this fiber optic splitter box ensures seamless connectivity across your fiber optic infrastructure. Pre-installed with 8 SC/APC simplex couplers and ...

Discover the longevity and reliability of AP®'s Chain Disk Feed System Direct Drive Power Units. Crafted from premium 304 Stainless Steel, these units are engineered to withstand the rigors of ...

Fiber Distribution box contains the shell, the internals (supporting frame, set fiber disc, fixing device) and optical fiber joint protective element. Prominent advantages of fiber termination box lie in efficient ...

GeneCards 6.0 Preview is live — explore APCDD1 in the redesigned release. See it now. This locus encodes an inhibitor of the Wnt signaling pathway. Mutations at this locus have been ...

With the new distribution box, centrally routed cables (with and without connectors) can be distributed 360° in all desired directions.

Negative regulator of the Wnt signaling pathway. Inhibits Wnt signaling in a cell-autonomous manner and functions upstream of beta-catenin. May act via its interaction with Wnt and LRP proteins. May ...
