

## Anti-tracking solution for lead-acid battery cabinets in Guatemala

### Overview

The Uniform Fire Code (UFC) Article 64, Section 104. e requires lead-acid battery installations with more than 100 gallons of electrolyte be equipped with a “liquid-tight” spill-control barrier system. EnviroGuard designs, manufactures and sells the only patented, UL listed spill containment system on the market, with optional FM Approved neutralizing and absorption pillows available. Federal and state fire regulations and countless other laws require spill containment for stationary lead acid. We can supply customized lead acid battery rack and cabinet system for solar, UPS, Telecom, Data center etc. The cabinet or racking system can be specified to accommodate any battery cell. An approved method to neutralize spilled electrolyte shall be provided. The method shall. Galooli Analyst is your go-to set of AI-powered dashboards designed to simplify energy management and help you make confident, data-driven decisions.
