

## C2C Optical Cable

## C2C Optical Cable

EAC-C2C is a group of submarine optical cable networks connecting countries in East Asia. It consists of EAC (East Asia Crossing) and C2C (City-to-City Cable System).

The C2C cable system is designed with a dual-ring ("8") configuration, i.e., the northern ring linking Japan, Korea, China, Taiwan, Hong Kong and the Philippines, and the southern ring linking Hong ...

Browse our optical communication connectivity products designed to help you enable your communication networks. Easily create a bill of materials list.

The cable's fiber strand construction reduces the risk of EMI/RFI, making performance stable when used in high interference environments such as data centers, surgical theaters, or manufacturing facilities ...

This USB Type-C to USB Type-C fiber optic cable (M/M) securely connects the USB-C or Thunderbolt 3 port on your MacBook, Windows laptop or other compatible device to an HDTV, monitor or projector ...

Looking for Submarine Cable capacity?

CommScope designs and manufactures a comprehensive line of fiber optic cables—from outside plant to indoor/outdoor and fire-rated indoor fiber cables.

This compact hybrid cable consists of glass fibers that support 4K@30Hz and 10Gbps data transmission. It enables to extend USB signals up to 15m in length over optical hybrid cable.

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.
