Process Design  
Physical Design: The Building and Its Components  
General Building Considerations  
Trust in Allied Steel Buildings For The Best Metal Distribution Center Buildings  
1. The Flow  
First and foremost, assess the flow of products through your warehouse—from the initial receiving stage to the final shipping stage. With an optimized flow, you can process goods through your facility efficiently to avoid any backtracking or pinch points. Consider the flow of not only items, but also of personnel and...  
2. Optimizing for Storage  
Logical product storage ensures efficient storing and picking operations. It's important to incorporate enough storage in your distribution center layout to meet your current demands. Then, optimize the storage method—you can group products by type, popularity, or another factor specific to your business.
