

## Fiber Optic Endface 3D Inspection Instrument

## Fiber Optic Endface 3D Inspection Instrument

Various instruments are used for inspecting bare or connectorized fiber endfaces: fiber microscopes, videoscopes and interferometric analyzers.

Buy fiber optic inspection equipment and tools from Cables Plus USA. Our fiber optic inspector tools offer networking installers many choices of endface inspectors and probes including single/multi-fiber ...

When producing fiber optic patch cord assemblies, manufacturers use 3D interferometer (which is an optical interferometry instrument) to check the fiber opti.

FiBO ® 250 Interferometer is a complete solution for accurate endface testing of all standard fiber optic connectors. High resolution 3D surface metrology and automated defect detection are combined in ...

The GL16 Interferometer provides all the necessary components for fiber end face geometry measurement integrated into a compact housing with a 7" capacitive touch-screen display for local ...

Shop fiber optic inspection scopes, including single- and multi-fiber inspection products from trusted brands like Dimension, Domaille, Viavi, and Jonard.

FiBO 250 Interferometer is a complete solution for accurate endface testing of all standard fiber optic connectors. High resolution 3D surface metrology and automated defect detection are combined in ...

High-end fiber microscope for detailed inspection of single fiber and multi-fiber ferrules and patch cords, such as SC, FC, ST, LC, MU, MT, MTP®/MPO, as well as objects requiring longer working distance ...

Dimension is committed to building a series of portable fiber optic end face probes/microscopes, becoming ideal tools for inspecting fiber connector end-face defects before and after network ...

The VFI series are Fiber End-Face Inspection Interferometers for quickly checking End-Face quality on fibers from 125 to 2000  $\mu\text{m}$  in diameter. The VFI is an interferometric inspection system specifically ...
