

Fiber optic cable replaced with router can't connect to the internet

Overview

A loose or incorrectly connected cable can often be the culprit behind internet connectivity problems with a new router. Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional DSL or cable internet. Most fiber ISPs. Whether you have an ONT, a modem, or a gateway, you can apply these A-B-C steps when you can't get online. Let's start with A: the basics. I was given a new gateway modem/router. Whether you're relying on a wired Ethernet setup or Wi-Fi, a broken connection can stem from various causes—from simple cable issues and. Solved New Fiber PPPOE service, Router "Connected" but no internet. The diagnostic router they had was able to connect over PPPoE and got internet service, so they said their hardware was good and. Fiber can improve the connection coming into your home, but it can't automatically fix what happens after that signal reaches your router, your Wi-Fi, or, ultimately, whichever devices you want to use. Think you know your routers from your repeaters — put your home networking know-how to the

Fiber optic cable replaced with router can t connect to the internet
