## France and South Korea bomb fiber optic cables

	<p>Police said the cables of several telecoms operators had been sabotaged in six areas of France overnight from Sunday into Monday but Paris was not affected. AFP confirmed with major carriers...</p>
--	--

	<p>A large number of cables were cut in the site's five chambers (concrete manholes buried in the ground and protected by cast-iron manhole ...</p>
--	---

	<p>These early cables used copper wires in their cores, but modern cables use optical fiber technology to carry digital data, which includes telephone, internet and private data traffic.</p>
--	--

	<p>Beyond the telecoms and tech service providers, a proxy war is playing out involving a handful of companies that engineer, manufacture, and install subsea fiber optic cables.</p>
--	---

	<p>This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time.</p>
--	---

	<p>Internet services throughout France were disrupted after fiber optic cables were cut in an apparent act of sabotage.</p>
	<p>Cables for several telecom operators were purposely cut in six areas of France earlier Monday, police told the French outlet Agence France Presse. However, Paris has not been affected ...</p>
	<p>Internet services throughout France were disrupted after fiber optic cables were cut in an apparent act of sabotage.</p>
	<p>A large number of cables were cut in the site's five chambers (concrete manholes buried in the ground and protected by cast-iron manhole covers), disrupting telephone, fiber and Internet ...</p>
	<p>So, some companies are trying to monitor what's going on in the vicinity of any cable - by using fibre optic signals to listen out for surreptitious underwater drones, or hostile vessels...</p>
	<p>PARIS — A second attack on key French infrastructure within days is putting increased focus on security around the Olympics as France hosts athletes and visitors from around the world.</p>

	<p>Pictures show neatly trimmed fiber optic cables dug up from underground behind what appears to be a well-hidden grate. This led to extensive interrupted internet service in the country and shockwaves ...</p>
