

High-speed spectrophotometer

High-speed spectrophotometer

LightMachinery is a high-resolution spectrometer manufacturer and supplier. We are setting the new standard for range, resolution, and speed. Learn more now.

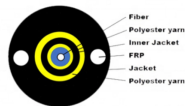

High-speed electronics and onboard processing make the Ocean Optics an ideal solution for process applications and measurement of fast events.

Hach ® water quality spectrophotometers are optimized for safe, consistent, quick and accurate water analysis results. Choose Hach portable or benchtop laboratory VIS or UV-VIS spectrophotometers in ...

Discover the top spectrophotometers of 2026 for research and industry. Compare updated models from Shimadzu, DeNovix, and Agilent for speed and accuracy.

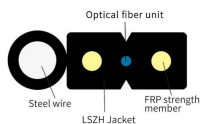

When it comes to high-speed spectrometers, Spectrecology offers a full line of options for the Ocean FX design. The Ocean FX fills a niche in the market where robust communication protocols, high-speed ...

The HR Spectrometer Series consists of our highest resolution spectrometers over the UV, VIS, & NIR wavelength range from 190-2300nm. Compared to our standard BLUE-Wave series, ...

This is where the high-speed versions of our spectrometer systems come into play, offering reliable and high-quality measurement results at even extremely high measuring rates.

They consist of an imaging spectrograph and a high-speed multichannel detector. The spectrograph utilizes a high-efficiency, ion-etched, aberration-corrected holographic grating.

The Hach DR6000 is a split beam ultraviolet / visible light spectrophotometer (UV - Vis) that delivers top performance for routine laboratory tasks and demanding applications. It offers high speed ...

Hitachi offers a full range of high quality UV-Visible/NIR and Fluorescence spectrophotometers from teaching and routine instruments to research-grade systems.
