

Hot Aisle of Iraq Micro-Module Data Center

Hot Aisle of Iraq Micro-Module Data Center

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.

What PUE can a modular data center achieve? Realistic targets for new modular deployments: 1.20–1.30 in cool climates, 1.25–1.35 in warmer European conditions, and 1.35–1.55 in ...

Based on a non-raised floor environment, this hot aisle containment project uses dual hinged doors and the Polar Cap 2 retractable roof system.

Rear of the optical fiber distribution box

Micro-module data centers usually adopt closed cold aisle or hot aisle technology to effectively isolate cold and hot air flows, thereby improving refrigeration efficiency.

The company has deepened its presence in the network infrastructure field and built a diversified product matrix covering core scenarios such as data centers, enterprise IT rooms and ...

The combination of these technologies gives FFAST unsurpassed sensitivity and accuracy, ensuring that alarms are coming from smoke and not nuisance particulate, such as dust, which can be ...

FusionModule800 Smart Small Data Center is a new-generation data center solution. It is integrated with PDU, UPS, monitoring, cooling and rack system in a comprehensive rack in order to save space. IT ...

A hot or cold aisle containment system effectively isolates the mixing of cold and hot air. In rack cooling with horizontal air flow is used to reduce hot spots in datacenters.

We offer a wide range of customizable hot aisle containment solutions with integrated cable tray systems to meet specific client requirements and optimize data center airflow management.

- High-efficiency integrated power distribution and closed cold and hot aisles, leading in power density and energy efficiency in the industry.
- Supports various configurations of single-row or double-row ...
