

Huawei 1310nm Optical Module Parameters

Overview

Wavelength: 1310nm This is the wavelength at which the module operates, suitable for long haul and high speed data transmission. If an SFP-10G-ER-1310 optical module is connected to a 10GBase-ER optical module (1550 nm, 10GE, 40 km), the maximum transmission distance is only 20 km due to different specifications such as the wavelength and receiver sensitivity. This module can only be used on a switch running V200R010C00 or a later. A 1310nm optical module lets you move data efficiently through fiber optic communication networks.
