

## Jordan Pluggable Optical Module 200G

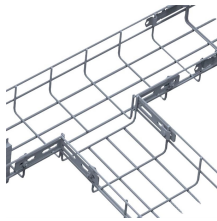

## Jordan Pluggable Optical Module 200G

The optical signal is transmitted over two parallel channels at a central wavelength of 1310nm. The module contains 2 parallel channels on the transmitter and receiver, each operating at 106.25Gbps. ...

Boost network performance with 200G optical transceivers. Designed for data centers, 5G, and cloud infrastructure, our QSFP56 modules deliver low latency, high reliability, and seamless compatibility.

It supports and aggregates a flexible mix of Ethernet, Fibre Channel, Video, SDH/SONET and OTN client services into a 200G uplink or two 100G uplinks. The platform supports various client services, ...

Our 2 x 100G modules use Duplex CS connectors, boasting a 40 percent size reduction from Duplex LC. They also allow for two duplexes (four fibers) in a single QSFP28-DD module, effectively doubling the ...

GIGALIGHT provides data center networks with a series of immersible 200G QSFP56 pluggable optical transceiver modules that support 200G Ethernet data rate.

The adoption of 200G/lane optical links in data centers lays the groundwork for the eventual deployment of 1.6T and 3.2T optical module solutions with 200G/lane serial electrical interfaces, which will be ...

The GIGALIGHT 200G QSFP56 pluggable optical transceiver modules support 200G Ethernet and InfiniBand HDR data rates. This portfolio includes SR4 100m, DR4 500m, FR4/PSM4 2km, ...

200G/400G/800G optical module features up to 40km transmission distances using QSFP56/QSFP-DD footprints for data center interconnect applications - FiberMall

GIGALIGHT provides 100G, 200G, and 400G pluggable digital coherent optical transceiver modules (DCO) for data center interconnection (DCI), 5G backhaul, metro telecommunication, and other long ...

200G CFP2-DCO C-Band tunable DWDM coherent optical transceiver module. MSA and OIF-CFP2-DCO specification compliant. Up to 2000km reach.
