

## M6000 Check the optical module

### Overview

Insert the optical module into the optical interface of the board, and then insert end A of the optical fiber into the optical module until you hear a click, which indicates that the fiber is properly connected 4. Page 1 ZXR10 M6000&T8000&8900E Series Routers and Switches Running the ZXROSNG Operating System Security Target ZTE CORPORATION NO. 55, Hi-tech Road South, ShenZhen, P. China Postcode: 518057 Tel: +86-755-26771900 Fax: +86-755-26770801 URL: cn. for the cloud-based 5G era. Focusing on the network requirements of 5G, big video/VR/AR, intelligent IoT and cloud computing, they use a new generation of large-capacity and high-performance in-house core chips for rates NP, SA, TM and FlexE. View online or download Zte ZXR10 M6000 Series Router Manual The ZXR10 M6000-S series routers are used as a unified service value-added platform in the backbone network, MAN and mobile bearer network of a network operator to improve network values. The routers can also be used in government, energy, education and enterprise networks. M6000-8S Plus There are two fan modules on the ZXR10 M6000-8S Plus chassis, located at the system air outlet. The system dissipates heat by air exhaust.

## M6000 Check the optical module

Insert the optical module into the optical interface of the board, and then insert end A of the optical fiber into the optical module until you hear a click, which indicates that the fiber is properly connected

One is Route Process Module (RPM), and the other is Management Process Module (MPM). ZXR10 M6000& T8000 can connect to the maintenance background through the 10/100/1000M Ethernet ...

The M6000-S series are used as SR and CGN devices on the control layer at the edges of metropolitan areas. The routers can also be used as backbone network devices, border routers, backbone node ...

Insert the optical module into the optical interface of the board, and then insert end A of the optical fiber into the optical module until you hear a click, which indicates that the fiber is properly connected 4.
