

Madagascar Direct-Buried Well Logging Optical Cable Manufacturer

Madagascar Direct-Buried Well Logging Optical Cable Manufacturer

Designed to meet the demands of today's data-intensive world, these cables are comprised of multiple optical fibers bundles in a flat ribbon format that is high ...

Middle East Fiber Cable Manufacturing Company (MEFC) is committed to provide its customers with consistent best quality products that comply with the specifications laid down by customers.

A complete well integrity monitoring system is created by combining the FEBUS A1 (DAS), the FEBUS T1-R (DTS) and the FEBUS G1-R (DSTS). Our solution offers highly sensitive devices, distributed ...

Unlike traditional intervention surveillance technologies, our well logging service delivers continuous, real-time data acquired along the entire length of the wellbore simultaneously.

Designed to meet the demands of today's data-intensive world, these cables are comprised of multiple optical fibers bundles in a flat ribbon format that is high density, lightweight, and durable.

With over 40 years of experience in manufacturing high reliability optical fibers, we are proud to offer a wide range of specialty optical fibers that are designed specifically for use in the oil and gas industry.

AFL is a leading supplier of downhole fiber optic cables used in the oil and gas industry. AFL provides the broadest portfolio of downhole products to ensure the optimal solution for each customer's ...

The range of cables for direct buried installation includes all our four basic designs: concentric core, grooved core tape, DryTech and tape in loose tubes. The cables are reinforced with corrugated steel ...

These cables, suitable for outside plant (OSP) applications, offer versatile installation options such as duct pulling, blowing, or direct burial, ensuring reliable performance in harsh environments.

Recommended technical requirements are detailed by reference to IEC 60794-3-11 on outdoor optical fibre cables for duct, directly buried, and lashed aerial applications. Changes and ...

ExpressFiber is run in offset wells to acquire direct measurements of distributed acoustic sensing (DAS) microseismic, strain and temperature.
