

Modular High-Voltage Busbar

Modular High-Voltage Busbar

One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client specifications. Busbars are essential components in electric ...

Custom designed to fit your space constraints while providing distinct electrical benefits, including low inductance, minimal voltage drop and specified partial discharge level.

Our busbars can be combined with fasteners of all shapes and sizes but when combined with our HPLB (High-Power Lock Box) terminal we can eliminate all loose fasteners and provide a self-aligning, ...

Design busbars for equal current sharing, low voltage drop, and scalability. Includes sizing, material selection, and thermal considerations.

Design busbars for equal current sharing, low voltage drop, and scalability. Includes sizing, material selection, and thermal considerations.

As EV platforms grow more power-dense and space-constrained, the need for safe, compact, and high-performance busbar connections becomes critical. Connor ...

Learn how TE's high voltage insulators provide robust, light-weight support for pantographs, busbars and other high voltage electric equipment on locomotives, multiple units and high speed trains.

This Tech Bulletin provides an overview of how new complex multi-layer molded busbar technologies can deliver significantly improved electrical performance ...

Widely used in data centers and industrial plants for high-current power distribution, these systems enable flexible layout and easy expansion through modular design.

Vertiv's High Powerbar (HPB) is a 1000V totally encased, non-ventilated and low impedance busbar. HPB sandwich construction range has been engineered for applications which require moving large ...

That's why we give customers a versatile range of high-performance busbar, connector and cable assembly solutions, backed by our 80+ years of proven experience across every major industry sector.

This Tech Bulletin provides an overview of how new complex multi-layer molded busbar technologies can deliver significantly improved electrical performance from batteries to the power inverters and ...

Robust HV busbar and enclosed busbar solutions up to 35kV, designed for substations, mining, and offshore platforms. Dust-proof, moisture-resistant, and compliant with IEC/ANSI standards.
