

Network Rack Lighting Installation Solution

Overview

LED rack lighting consumes 80% less electricity than incandescent alternatives while it produces minimal heat that affects HVAC systems. PoE lighting systems simplify installation because they share infrastructure with existing Cat-6 networking cables, which eliminates. Rack-integrated lighting systems refer to luminaires specifically mounted on or inside data racks, designed to provide direct illumination for equipment access, maintenance, and cable management. ASHRAE standards recommend minimum 200 lux vertical illuminance on rack faces and 500 lux on equipment tops, but these numbers only tell part of the story. By using NavePoint. com, you are agreeing to our revised Privacy Policy The NavePoint 1U steel panel light works on any standard 19-inch server rack or cabinet and does an important job, helping you clearly see your equipment even in your low-lit server rooms. Ideal for dimly lit environments such as server rooms, control centres, staging areas, studios and AV installations, these rack-mount lights. Data Center professionals have long hunted for the perfect rack lighting solution. Our fixture answers this need beautifully, mounting either vertically or horizontally in standard equipment racks to provide both task and accent lighting.

Network Rack Lighting Installation Solution
