

## New QSFP Optical Module from Slovenia

## New QSFP Optical Module from Slovenia

This article explores how to interconnect OSFP and QSFP-DD ports in 400G/800G networks, covering key principles, form factor differences, and practical solutions for stable, high-speed data center ...

The QSFP28 module provides 100GBase-LR4 throughput up to 10km over a standard pair of single mode fibre (SMF) with duplex LC connectors. This transceiver is compliant with IEEE 802.3 ...

WolonFiber manufactures strictly MSA-compliant 100G QSFP28 and 200G QSFP56, QSFP-DD, and heavy-duty CFP2 optical interconnects optimized for ultra-dense Spine-Leaf topologies and long-haul ...

The 40G QSFP+ SR4 optical transceiver transmits data over multi mode fibre at a distance of up to 150m. The transceiver operates on 4 wavelengths and works in point-to-point scenario.

40G QSFP+ optical transceivers available in multimode (100m & 300m) and single mode options (2km, 10km, 40km) and DAC cables, with a Lifetime Warranty.

Learn how to pick a 400G fiber module for QSFP-DD hyperscale links, compare key optical specs, avoid common failures, and estimate TCO for 2026 upgrades.

Browse optical transceivers from Pivotal Optics including SFP, SFP28, QSFP28 & QSFP-DD modules. 1G to 400G solutions for data centers & networks. Shop now!

As high-speed networks continue to evolve, optical transceivers like QSFP-DD, QSFP28, QSFP56, SFP56, and SFP28 have become the core components enabling

QSFP-DD optical module for reliable 400G fiber connections, perfect for distances beyond DAC reach, up to 100 meters! The module includes built-in digital diagnostics for optical power, voltage, ...

The 40G QSFP+ SR4 optical transceiver transmits data over multi mode fibre at a distance of up to 150m. The transceiver operates on 4 wavelengths and works in ...

The QSFP-DD transceiver is a new optical module comparable to the current QSFP but adds an extra row of contacts for an eight-lane electrical interface. All QSFP-DD-based transceivers ...
