

Optical Module Replacement Products

Optical Module Replacement Products

Design requirements Modern optical module designs often require: Reduced power consumption to control and limit module temperature rise. Dynamic and precise control of laser diodes to regulate ...

We manufacture individual optical and optoelectronics OEM modules for our customers. The tasks and solutions are diverse and range from classic lenses and high-performance lighting modules to ...

Optical passive components from individual isolators, couplers and PM components, to multi-function integrated components such as isolator with WDM, isolator with PM Beam Combiner, and circulator.

Dmklaserwelding laser repair parts – fiber cables, optical modules, pump sources & more. OEM-compatible, High-quality components for effective laser system repairs, In stock availability.

We provide spares support for refurbished lasers and optical components on micro-photolithography and metrology capital equipment used in manufacturing semiconductor components.

As a leading supplier of advanced fiber optic components, Molex has an extensive product offering that includes a full range of fiber optic connectors and adapters. Molex's experience and resources ...

Choose from single emitters, bars, stacks, or fiber-coupled modules. Choose from a broad selection of laser diodes, arrays, and modules for automotive, industrial, and consumer sensing applications.

Corning has a wide variety of hardware solutions to choose from to fit your cabling needs. Choose from racks, panels, modules, splice trays, ethernet fiber switches and other structured cabling components.

Fast Spare Parts Replacement: Maintaining a safety stock of regular products and cooperating with professional logistics companies to ensure spare parts can be delivered to the ...

Modules and panel accessories include patch and splice modules, adapter plates, pigtail assemblies and fiber management optical cassettes.
