

# Optical Power Meter Calibration in Paraguay

## Overview

This application note demystifies how EXFO's IQS-12002 Optical Calibration System can guide you through the calibration of power meters, covering issues such as traceability and technical characteristics of detectors, while explaining the procedure in detail. Micro Precision Calibration provides ISO/IEC 17025 accredited services for a wide range of optical test equipment. From manufacturing floors to research labs, our optical calibration services guarantee that your instruments, whether for fiber optics, photometry, or dimensional inspection, deliver. As the global leader in calibration services, we provide precision calibration expertise in every industry, domain and instrument across the world. If we find a performance problem with the received instrument, we will let you know. Our accredited calibration. Optical power meters are designed to measure optical power in a specified wavelength range as accurately as possible. Due to the fact that this capability largely depends on the quality of the calibration process, it is important to carefully select your calibration provider.
