

**Original Authentic Low-Temperature
Resistant Long-Distance Optical
Transceiver**

Original Authentic Low-Temperature Resistant Long-Distance Optical

Compatible optical transceivers 1G, 10G, 25G, 40G and 100G in multiple form factors including SFP, SFP+ XFP, QSFP+, QSFP28 and CFP with a lifetime warranty.

Find genuine vendor original optical transceivers from verified suppliers. Ensure quality and compatibility with our curated list. Click to explore top-rated, authentic options today!

Discover FS's QSFP28 100G LR4 optical transceiver, offering low power consumption, perfect compatibility, and reliable long-distance performance for data centers and enterprise networks.

The SX1276 LoRa AS32 TTL-100 433MHz transceiver module offers long-range, low-power communication for IoT, industrial, and remote sensing applications.

Although this reduces the effective throughput of the 100GbE port to 25GbE, it provides an immediate low-cost transceiver solution while preserving the option for later bandwidth expansion.

FIBERSTAMP excels in producing silicon optical modules, mastering both traditional III-V laser-based optical modules and cutting-edge silicon optical technology.

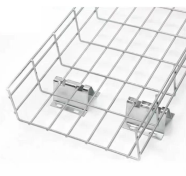

About Company : Genuine Optics is world-leading optical transceiver provider. The company is registered in San Jose, California, with new buildout manufactory in Thailand.

Sabre series size 09-01 printed circuit board mounted optical transceivers, transmitters and receivers enable high speed network communications over long distances in harsh environments.

Put the power of choice back into your hands with our extensive product suite of optical transceivers built to ensure network reliability without compromising performance.

The Huawei eSFP-1310nm-1.25G-10km is a high-performance optical transceiver designed for efficient data transfer at 1.25Gb/s over long distances up to 10km. Using a single-mode LC interface, this ...
