

The internet connection drops as soon as the optical module is plugged in

Overview

The most common causes of this are loss of power to the fiber terminal (ONT) or an unplugged network cable. The other end of this cable should be plugged into the active wall jack or indoor. Experiencing a fiber outage can be frustrating, especially when you rely on internet services for work, entertainment, or communication. If that does not resolve your internet issue, you can follow these instructions to check the power to, or restart, your ONT. Not sure if you have an ONT?

The video below can help you. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. Modem: Turns incoming and. Fiber optic transceivers play a crucial role in transmitting data over fiber optic networks.
