

# Tunisian Telecom Shelter Immersion Liquid Cooling

## Overview

A field equipment shelter fitted with fault-tolerant cooling is ensuring the reliability of a wireless communications link that connects instrumentation on a new gas pipeline crossing a Middle Eastern desert to the remote-control room. STULZ shelter cooling solutions are purpose-built for remote and outdoor environments where reliable climate control is critical. Designed for use in telecom shelters, base stations, and other mission-critical outdoor enclosures, these systems ensure stable temperature management in even the. Immersion cooling technology encompasses systems in which electronic components are directly exposed to and interact with dielectric fluids for cooling purposes. This method efficiently dissipates heat, enhancing performance and energy efficiency. Traditional air cooling methods like computer room air. Immersion cooling a. Fabricated from tough glass fibre-reinforced polyester (GRP).
