

What is an ATXH distribution box

Overview

An air conditioning distribution box is a metal enclosure that houses fuses or circuit breakers, contactors, wiring lugs, and sometimes surge protection for an air conditioning system. ATX's market-leading media distribution solutions empower service providers to elevate their commercial services to meet the post-pandemic expectations of the guests and residents of hotels, hospitals, sporting events, elder-care facilities, multi-dwelling units (MDUs) and other communal venues. Its main products include over 50 packaging forms such as the full TO Power series, SOT/SC series, and DFN series, covering MOSFET. A distribution box, also known as a power distribution box or electrical distribution box, is used to distribute electrical power safely to multiple circuits.
