

# What is an unbreakable pigtail cable

## Overview

A fiber optic pigtail is a short-length cable with a pre-terminated connector on one end and a bare, unterminated fiber on the other. (12-core, 24-core) to patch panels, ODFs, or devices via fusion splicing. A pigtail connector is a small wire that makes a big difference. (switches, routers, transceivers) to passive components (e.g. They connect two or more devices and find their use in telecommunications and data communications, where they serve as a reliable means of transmitting signals. It ensures a secure connection by combining wires with a wire connector, like a twist-on connector or a wire nut, and then linking them to the intended.
