

## What panel should be installed on the fiber optic junction box

### Overview

The optical fiber termination box is mounted on the wall or on the 19 inches (483 mm) wide standard rack. Its ports usually range from 12 to 48, and some are designed to be wall-mounted. Listed below are. This extended definitive guide examines every facet of the fiber optic patch panel vs fiber optic termination box comparison. If you already know what your project requires, check out our complete Fiber Patch Panel selection. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. They are available in various fiber connector types, such as LC patch panel, SC patch panel and MTP patch panel.
