

# What s going on with fiber optic cables

## Overview

A shortage of fiber-optic cable equipment is blamed on AI data center demands as well as US protectionism. Warnings about a US fiber crunch that could slow down broadband deployment have intensified since the summer. In August, Incab America, a Texan maker of fiber-optic cable, notified customers. With data-intensive activities like video streaming, cloud computing, online gaming, and remote working, the need for lightning-fast and dependable internet connections has skyrocketed. This analysis explores the technological advantages, growing adoption rates, and future implications for internet users, helping you understand the next evolution of online connectivity. The. From a splicer's standpoint, ribbon cable is "much more user friendly and much more organized" because multiple fibers are bonded together. With a market value reaching USD 2.9 billion in 2024, it is more than just a growing industry—it is the backbone of a digital revolution.

## What s going on with fiber optic cables

With tariffs driving up the cost of imported fiber optic cables, supply chains are getting squeezed. That's a problem, considering fiber optics are the backbone of modern communications, ...

Fiber optics is at the center of the next wave of digital transformation. As demand for speed, capacity, and resilience continues to surge, emerging fiber optic technologies in 2025 are ...

A shortage of fiber-optic cable equipment is blamed on AI data center demands as well as US protectionism.

Explore the 2026 data showing why fiber internet is overtaking cable. Learn how speed, reliability, and new infrastructure are driving the next big shift in U.S. ...

Explore the 2026 data showing why fiber internet is overtaking cable. Learn how speed, reliability, and new infrastructure are driving the next big shift in U.S. connectivity.

Both incumbents and AltNets are investing heavily in deploying fibre optic cables to meet the growing demand for high-speed connectivity. Fibre deployment in America is not constrained by ...

As the industry looks ahead, six major trends are shaping the future of fiber deployment—from smarter buildouts and next-gen cables to workforce training and quantum-driven ...

This article unpacks the growth, driving forces, and future trajectory of the U.S. fiber-optic cable market.

This article unpacks the growth, driving forces, and future trajectory of the U.S. fiber-optic cable market.

As we approach 2025, the fiber optics industry is poised for significant advancements, driven by the ever-growing demand for faster and more reliable connectivity.

Lead times for ribbon fiber are in the “60-plus weeks range” as vendors struggle to make enough cable for data centers and future BEAD projectsThere''s also a | Fiber cables and glass are in ...

Copper wire thieves are cutting through fiber-optic cables and disrupting telecommunication services.
