

Zhongji United Optical Module

Zhongji United Optical Module

This requires a lossless, high-bandwidth fabric where optical transceivers are the critical enablers. Data indicates that the deployment of 800G optical transceivers is expected to double in ...

Zhongji InnoLight is deeply engaged in the R& D and manufacturing of optical communications modules and devices. Its products have successfully entered the global mainstream market and are widely ...

Recently, Zhongji Innolight responded to investor inquiries on an interactive platform, stating that the company's 800G products have been in mass production. In 2023, these products ...

The company's performance was fueled by explosive demand for its high-speed optical modules from top-tier cloud providers and AI companies, resulting in record profitability, robust cash ...

Chinese optical module suppliers, led by Zhongji InnoLight, dominate global market share on AI demand, even as a severe optical chip shortage looms for 2025. The global surge in AI model ...

Explore how Zhongji Innolight's motor-stator expertise can ride AI and optical-module trends, diversify revenue, and secure supply-chain growth in China's volatile industrial market.

With the increasing demand for high-speed optical modules such as 800G and 1.6T for AI servers, optical chips, which are important components of optical modules, are in short supply.

The company focuses on high-speed optical transceivers, with a product portfolio spanning 100G, 200G, 400G, 800G, and 1.6T, supporting the continuous evolution of bandwidth and compute interconnect ...

The main products of Zhongji InnoLight are optical modules and optical devices. The wholly-owned subsidiary Suzhou InnoLight is responsible for the optical module business, and the ...
